CounterSolutions

Software for service companies

Solution Sets for business types

These are general setups for types of business structures. You can mix and match to fit your business type.

Retail and Service

For a business that has retail location(s) and a strong service business.

Retail, Service and Sales

For a business that has retail location(s), a strong service business along with the need to have sales appointments and tracking.

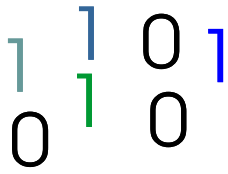

Retail, Service and Sales

For a business that has retail location(s), a strong service business along with the need to have sales appointments and tracking. The PLUS (+) package gives your CRM features of sales funnel, lead follow-up and more.

Additional modules and add-ons are available. Integration with Microsoft Windows Mobile 5.0 and Microsoft's MapPoint are now available.

These are additional modules of CounterSolutions software that you can add to your solutions set.

Delivery

For those that also want to track deliveries, we offer CounterRoute.

Web integration

Web services, hosted site. A full working, custom web site for your business! Integrates with CounterSolutions software.

Web integration

For those that want interact with their customers on the Internet.

Web integration

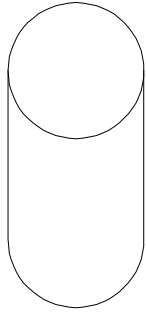

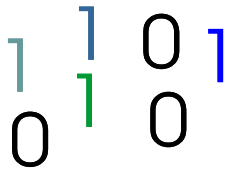

For those that want interact with their appointment schedule on the Internet. For sales, service and/or delivery schedules.

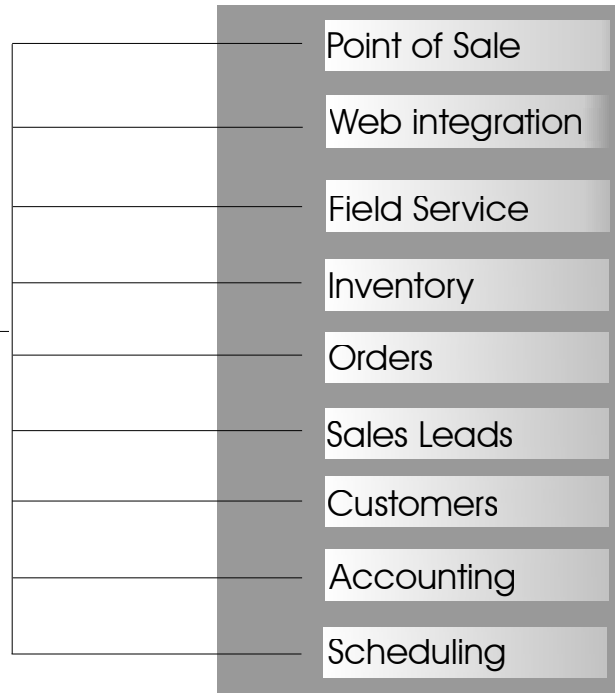

Field Service (stand alone)

For those that do not need CounterPoint for retail. A complete non-integrated Field Service product.

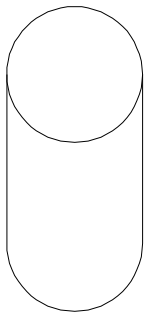

One, single database

All the functionality in a single MS-SQL database. The very powerful, yet elegantly easy to use BioGuard Business Management System.

Three Layers of Integration

One, single database

Choose the level of power you need and the integration point that fits your business best.
